

The Work Behind The Besorah Seed

The Account of Bruce W. Atkinson

A Seed Planted Early

In 1982, Bruce W. Atkinson stood before the ancient pyramid of Chichén Itzá.

What he saw was more than stone—it was **precision**.

An ancient structure aligned with the sun, marking time with a level of accuracy that rivaled even modern systems.

In that moment, a question took root:

If the ancients could track time this precisely... what have we lost?

That question would follow him for decades.

A Pursuit That Would Not Let Go

Bruce did not leave that question behind.

Over the years, he tested and examined:

- Calendar systems from different cultures
- The alignment—and misalignment—of modern timekeeping
- The actual movement of the sun

This became a **20-year pursuit**, including:

- Deep study
- Careful observation
- The reading of **nine books on calendars and timekeeping**

Through it all, one standard remained:

What aligns with the heavens must be true.

A Mission Beyond Time (2007–2012)

From 2007 to 2012, Bruce served as a missionary.

Traveling from **Oahu to Newport-Oregon (home) then to Ghana, West Africa**, he stepped into a life of service, discipline, and real-world experience.

In Ghana, he observed:

- The rhythm of life under the sun
- The natural order of daily living
- The connection between creation and time

Time was not theoretical—it was **lived**.

And through that experience, the question deepened:

What is the Creator's true order of time?

The Turning Point — 2008

During this missionary period, in 2008, Bruce encountered the **Enoch Calendar within Scripture**.

Here was a system revealing:

- A **364-day structure**
- Exactly **52 complete weeks**
- A calendar rooted in **order, not confusion**

It aligned with everything he had been searching for.

The Work of the Sundial (2012–Present)

In 2012, Bruce began a new phase of the work:

He turned from study alone to direct observation

He began reading, studying, and working with a **sundial**.

Not just using one—but building one.

Built, Aligned, and Tested

In 2021, Bruce completed and mounted his sundial in his own backyard.

It was carefully aligned:

- Set in position
- Aimed toward **Polaris (true north)**
- Structured for accurate solar tracking

This was not symbolic.

It was **functional and precise**.

Observing the Heavens

From that point forward—and continuing through **March 23, 2026**—Bruce has consistently observed:

- Spring Equinox
- Fall Equinox
- Summer and Winter Solstices

Year after year.

Not occasionally—but **continuously**.

Proven Through Observation

Through this ongoing work, Bruce did not rely on theory.

He:

- Watched the sun's movement
- Confirmed seasonal transitions
- Tested alignment year after year

And through this process, he adapted and refined his understanding.

What he found was clear:

The Enoch 364-Day Solar Calendar is not only structured—it is in harmony with the heavens.

The Establishment of The Besorah Seed

From decades of study and years of direct observation, Bruce established:

The Besorah Seed Enoch 364-Day Solar Calendar

This work is built on:

- Scripture
- Structure
- Observation
- Repeated confirmation

The Core Truth

Through everything—study, travel, building, and observation—one truth stands:

The Creator’s system has not changed—only man’s understanding of it has.

A Work for the World

Today, Bruce continues to:

- Teach
- Refine
- Share

This is not presented as theory—

But as something that can be:

- Seen
- Tested
- Lived

Closing Statement

From Chichén Itzá...
To Ghana, West Africa...
To a sundial aligned to Polaris...

The work has been consistent.

Patient. Observed. Proven.

And what it reveals is simple:

**Heaven already declares the time.
The work is to see it, confirm it, and walk in it.**
